

**TEETH ARE
ON THE RAILS!**

[MEGADENTIST.COM.TR/EN](https://megadentist.com.tr/en) 

As we express to our patients who have just joined our family in our journey that we continue with the inspiration of your happiness: Megadentist is a clinic that makes a difference in the field of oral and dental health and never forgets that happy patients are only possible through happy employees.

We have been with you for 15 years with our Ankara and Istanbul polyclinics in order to make you smile to the fullest, to create preventive health awareness regarding oral and dental health, and to sustain health and aesthetics together.

As the Megadentist Family, which offers solutions that will leave behind all your worries about oral and dental health, which we often ignore or find expensive, and sometimes put into the background because we are a little afraid, we continue to be by your side with our specialist physicians without compromising quality.

OUR ONE WISH FOR 15 YEARS IS YOUR HEALTHY SMILE!

Through our experience in the field of oral and dental health and our expert physician staff; it is our greatest source of happiness to let our patients that we serve to smile with self-confidence, speak freely, and regain their health.

MEGADENTIST IN 7 REASONS

1

EXPERIENCE

We consider the happiness of our patients more valuable than anything else; and within these 15 years, in which we gained very valuable experiences, we have thoroughly managed all processes for this purpose, and have not given up on the culture of continuous improvement for a moment. We wish to celebrate many 15 years with our thousands of patients who smile to the fullest and live towards a healthy tomorrow after their Megadentist experience...

2

PATIENT SATISFACTION

It is our greatest happiness to know that as Megadentist, serving in all branches of oral and dental health from implants to orthodontics, from endodontics to teeth whitening, from aesthetic dentistry to periodontology, we have brought healthy and aesthetic smiles to thousands of our patients.

3

EXPERT STAFF

The reason why we are the only institution that provides a guarantee certificate to all the treatments it performs is the privilege of being managed by an expert staff who has achieved many successes in their respective fields.

4

POWERFUL TECHNOLOGY

Our devices, which are designed and developed with state-of-the-art technology, enable us to use methods, which are simultaneous with the rest of the world, in the diagnosis and treatment of diseases. Using the latest technology in all the branches that we serve helps us to offer our patients the comfort and safety they deserve.

5

PERSONALIZED SERVICE

For us, every patient is special, every patient is valuable. In determining the needs of our patients and the treatment methods for these needs, we carry out a multidimensional assessment, and we do not evade from this point of view even for a moment in order to obtain satisfactory results.

6

LOCAL AND GLOBAL HAPPINESS

It is our primary vision to contribute to our country's ranking in the first place among the world's preferred countries in the field of oral and dental health. We are working hard to develop an exemplary management approach so that patients who come to our country from abroad can complete their treatment safely and return to their countries with satisfaction from the service they receive. In addition to our quality and expert health services, we also provide airport transfer and translator privileges, providing full support to our patients visiting from abroad.

7

TREATMENT GUARANTEE

As Megadentist, we trust our service quality and our expert physicians, as well as we want you to have peace of mind while receiving service from our clinic. That's why we offer you a guarantee certificate for all the treatments you have at Megadentist.

APPLICATIONS

Oral Diagnosis and Radiology

Periodontology

Implant

Teeth Whitening

Aesthetic Dentistry

Restorative Dentistry

Orthodontics (Bracelet)

Endodontics (Root Canal Operation)

Pedodontics

Prosthetic Dentistry

ORAL DIAGNOSIS AND RADIOLOGY

What is it?

Oral diagnosis is the department that undertakes the diagnosis and treatment planning of oral diseases and systemic diseases that show indications in the mouth. Radiology, on the other hand, is a science that uses various imaging technologies in the diagnosis and treatment of diseases.

Good to know

- Oral diagnosis is divided into two main groups as intra-oral and extra-oral.
- Basic scientific studies in oral diagnosis can be grouped into four groups: Definition of symptoms, definition of syndromes, diagnostic methods and determination of laboratory-radiological-pathological applications/methods that will lead to diagnosis.

PERIODONTOLOGY (GINGIVAL DISEASES)

What is it?

Periodontology is a branch of dentistry that examines the clinical and microscopic structure of the hard and soft tissues surrounding the teeth, diagnoses the diseases affecting these tissues, applies their treatments and maintains the health gained afterwards.

Good to know

- Inflammatory conditions affecting the soft and hard tissues surrounding the gums and teeth are called periodontal disease.
- Periodontal diseases can be prevented and controlled to a large extent by the treatments applied by specialist physicians.

IMPLANT

What is it?

Implant is a treatment method applied by surgeon dentists in order to recover tooth deficiencies and to produce solutions closest to natural teeth. The advantages such as the feeling of chewing being the closest to natural and the feasibility of treatment without interfering with other teeth have made implant-containing methods one of the most applied treatment methods in the century we live in.

Good to know

- It is an application that must be applied exclusively by surgeon dentists.
- Since the application is executed into the bone, it is mandatory to work in a completely sterile environment.

ORTHODONTICS (BRACELET)

What is it?

Orthodontics is a branch of dentistry that deals with the correction of upper and lower jaws and tooth intricateness.

Good to know

- The need for orthodontic treatment can only be determined by the dentist or orthodontist.
- Orthodontic treatment should be applied in cases such as unbalanced face and jaw structure, no contact of upper and lower teeth or excessive intertwining.
- Even though orthodontic treatments should start at a young age in order to receive positive results for the patient and the physician, orthodontic treatment can also be applied to adult people.
- The duration of orthodontic treatments can vary between 6 months to 24 months.
- Metal brackets, porcelain (transparent) brackets, lingual brackets and transparent plaques are the types of the braces.

ENDODONTICS (ROOT CANAL OPERATION)

What is it?

Root canal treatment is an application that allows the removal of the damaged part of the infected or decayed tooth and the disinfection of the tooth to be saved.

Good to know

- Infected nerve tissue, blood vessels and other cellular debris are removed from the root canal through endodontic treatment.
- Then the root canal cavity is cleaned and shaped using canal files and disinfectant solutions.
- Finally, the tooth is filled with tissue-friendly materials in a leak-proof manner.

PEDODONTICS

What is it?

Pedodontics, also known as Pediatric Dentistry, is a branch of science that aims to protect the health of the primary and permanent teeth of children aged 0 to 12 and to treat the diseases that occur.

Good to know

- Pedodontics covers pediatric dental treatments, which are excluded by orthodontics.
- It deals with preventive applications from caries, restorative and root canal treatments of caries in primary and permanent teeth, restorative and prosthetic treatments in teeth with developmental anomalies in children, methods to prevent periodontal diseases and preventive orthodontic applications.

TEETH WHITENING

What is it?

Whitening is the process of removing the discoloration that occurs in the structure of the teeth (enamel and dentin layer).

Good to know

- There are two types of whitening processes, domestic applicable and applied in the clinic.
- The type of whitening to be used strongly depends on the degree of discoloration, how quickly the treatment is desired to be completed and the opinion of the physician.

AESTHETIC DENTISTRY

What is it?

Aesthetic dentistry is a branch that deals with the reorganization of the oral and dental region in terms of health and aesthetics.

Good to know

- Aesthetic dentistry aims to design the ideal personal smile in a healthy and natural way.
- Factors affecting the ideal smile include age, gender, facial features, lips, color, shape and arrangement of teeth and gums.
- Porcelain laminate, Zirconium, and I-max bonding are among the most conservative (protective) aesthetic dentistry treatments.

BEFORE

AFTER

BEFORE

AFTER

RESTORATIVE DENTISTRY

What is it?

This operation aims to restore the aesthetic structure of teeth that display shape defects and deformity, especially in color.

Good to know

- Restorative treatment provides the detection of broken and cracked teeth and the provision of their functions.
- Evaluates existing fillings, redoes or repairs if necessary.
- With this treatment, all kinds of aesthetic dentistry applications are performed by preserving the existing dental tissues.

PROSTHETIC DENTISTRY

What is it?

It is the branch of dentistry that meets the health and visual needs of the individual by replacing the missing teeth in the mouth with prosthesis.

Good to know

- Dental prostheses are basically classified as fixed prostheses, removable prostheses and over-implant prostheses.
- Fixed prostheses are prostheses applied by taking support from existing teeth and fixed by sticking to these teeth.
- Removable prostheses are prostheses applied by taking support from both the teeth and the gum, tooth and bone tissue remaining in the area of the lost tooth.
- Implant prostheses are titanium screws in the form of tooth root placed in the jawbone to replace lost teeth.

CONTRACTED INSTITUTIONS

SPECIAL SERVICES FOR PATIENTS TRAVELLING FROM ABROAD

Our patients traveling from abroad prefer our beautiful country, where they can perform their dental treatments in economical, well-equipped, and much better conditions due to the changing health policies in the countries they live in and the difficult financial conditions.

As Megadentist, we are happy to send our patients off to their countries with their satisfied and smiling faces, with the privileges we have prepared specially for our overseas patients who prefer us.

SO, WHAT DO WE DO SPECIFICALLY FOR OUR PATIENTS TRAVELING FROM ABROAD?

- Within the scope of health tourism, we are by our abroad patients' side, who prefer us for their oral and dental health treatments, from the moment they contact us until they complete their treatment.
- We guide them on how to buy plane tickets, which route would be more convenient, and which airline is the most reasonable airline that they can choose.
- As soon as they step into our country, we welcome them with our staff who speak their own language.
- We accompany them with a VIP transfer vehicle from the airport to their hotels.

- We ensure that they settle into the 5-star hotel they will be staying in without any problems.
- Thanks to our distinctive staff who speak our guests' own language and have command of English, we let our patients communicate in their own language throughout their entire treatment.
- We drop them off at the airport after their treatment is over.
- We continue our communication with our international patients, whom we send off to their countries, after the treatment.
- While providing oral and dental health treatments, we also provide a service where they can experience Istanbul, the world capital of culture.
